Faisal Husain is an entrepreneur and proven business leader with over 25 years of financial services, technology and consulting expertise. He is the co-founder of Synechron and serves as its Chief Executive Officer since its inception in 2001. He is responsible for providing the vision and leadership that has facilitated the successful establishment of Synechron as a leading digital transformation consulting firm for the financial services industry.

Faisal brings Synechron and its clients a deep understanding of the Financial Services industry, a strong techno-functional background, keen business acumen and, most importantly, a penchant for innovation and growth enabled by the deployment of cutting-edge digital tools.

A technology evangelist and solution architect, Faisal's vision was to make Synechron a globally acclaimed strategic solutions partner offering high-end technology capabilities and deep domain understanding, rather than merely being a provider of manpower services or a technology services seller. Faisal's leadership and guidance have been critical in establishing and enhancing Synechron's flourishing position as a proven digital innovation & transformation leader in digital, business consulting & technology services. clear business focus was, and continues to be, inspiring and facilitating innovation for the purpose of solving critical business needs for enterprises across the global financial services spectrum. This leadership has enabled Synechron to produce $650M+ annual revenue and it currently employs a workforce 11,000+ talented individuals across 22 global locations.

In leading Synechron, Faisal focuses on what he values most: helping clients address difficult business challenges. This includes developing and deploying cutting-edge innovation and emerging technologies, empowering financial services companies with an array of customized digital transformation solutions and enabling enhanced operating models for securing future business opportunities. Faisal believes in encouraging employees to work collaboratively to leverage their innovation skills as they closely consult with clients to really understand and solve their real-world business needs.

Under Faisal's leadership, Synechron has continued to invest heavily in R&D initiatives to drive forward digital innovation, and the launch and support of Synechron's global Financial Innovation Labs (FinLabs). These 13 global FinLabs allow financial institutions to experiment with the latest digital technologies in a guided, immersive, experiential environment. It is this direction that led to the successful launch of Synechron's 8 Accelerator programs to date focused on Blockchain, Artificial Intelligence Automation (AI), RegTech, WealthTech, InsurTech, AI Data Science, Digital Ecosystems and most recently the InvestTech Accelerator. Each FinLab-created Accelerator program features a suite of individual use case-inspired, customizable building blocks driven by digital innovation, expert design, and engineering.

Before founding Synechron, Faisal spearheaded the technical development of enterprise-level e-commerce applications for major Wall Street financial institutions based in New York and served as a Partner at Fusion Technologies.

In his spare time, Faisal enjoys his 4x4 wheel drives to unexplored areas of nature, photography, restoring and customizing vehicles, playing the guitar, and spending time with his family.

He holds a Bachelor of Technology degree in Aeronautical Engineering and a Master of Science degree in Computer Science from Pace University, New York.
